DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in the reply filed on 10/31/05 is acknowledged.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 11 recites the limitation "the control means" in line 1. There is insufficient antecedent basis for this limitation in the claim.

6. Claim 11 recites the limitation "the desired receiver" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 2621

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1, 2, 5, 6, and 8-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Lemelson et al (2002/0022927) for the same reasons as set forth in Section 14 of the last office action, dated 2/10/06.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

11. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lemelson et al for the same reasons as set forth in Section 17 of the last office action, dated 2/10/06.

12. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lemelson et al in view of Jones et al (5,194,843) for the same reasons as set forth in Section 18 of the last office action, dated 2/10/06.

Response to Arguments

13. Applicant's arguments filed 5/11/06 have been fully considered but they are not persuasive. Applicant asserts on pages 7-9 of the Remarks that Lemelson et al fails to disclose transmitting a video signal. However, Figure 3 of Lemelson et al illustrates the concept of such video transmission capability between the vehicle and the control center through a video processing transceiver. In particular, [0113] discloses various communications (e.g. speech, control signals, and digitized video driving conditions) are transceived (i.e. passed to and through a video processor) between the vehicle and the control center in order to identify video objects on the road.

14. In response to applicant's argument on page 10 of the Remarks that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., how to select video signals) are not recited in the rejected claim(s). Figure 1 of Lemelson et al illustrates a controller 12 capable of selecting a video signal from any one of three receivers 10. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant requested Examiner in providing support regarding the particular antenna setup as specified in claims 3 and 4. It is submitted that applicant explicitly stated on pages 15 and 17 of the Specification, for examples, that the most common

Art Unit: 2621

mounting heights for a typical helix antenna is from 1.5 meters to 3 meters. Examiner agrees that such assumption by the applicant is correct and therefore it is considered notoriously well known in the art.

Conclusion

15. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
